Dear Mr. Rigby:

This letter pertains to the Lassen National Forest's Supplemental Statements of Water Diversion and Use for 2004, 2005, and 2006. Enclosed are 58 of the 70 Supplemental Statements of Water Diversion and Use, which were completed by Andrew Breibart, Hydrologist on the Lassen National Forest. I designated Andrew Breibart through his supervisor, Scott Tangenberg, Forest Hydrologist, to complete the Supplemental Statements.

Five of the remaining 12 Supplemental Statements were forwarded to Alan Olson, Ecosystem Staff Officer for the Shasta-Trinity National Forest in Redding, CA, for completion. Listed below are these five statements, which have points of diversion and points of use on the Shasta-Trinity National Forest:

- S001371,
- S001412,
- S001413,
- S001416, and
- S001421,

Please update your records to reflect USFS Shasta-Trinity National Forest as the "Primary Owner" for these Supplemental Statements.

Of the seven other Supplemental Statements that we have chosen not to file, these are exact duplicates of seven stock certificates.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.
